

JAYARAJ PATIL

OpenShift Administrator L2 | Linux & Kubernetes Infrastructure Specialist

Bengaluru, India | jayarajvp2005@gmail.com | +91 7349426572 | [linkedin](#) | [GitHub](#)

PROFILE SUMMARY

OpenShift Administrator with hands-on experience managing 800+ Linux servers and production OpenShift/Kubernetes clusters. Proven track record taking OCP clusters to production readiness through CIS/STIG compliance hardening, monitoring and alerting design, and OADP backup/restore implementation. Skilled in disconnected/air-gapped cluster upgrades, image mirroring, service mesh deployment, and Ansible-based automation.

CORE TECHNICAL SKILLS

Container Platforms: OpenShift Container Platform (OCP) 4.x, OpenShift Virtualization, Kubernetes, Docker, Podman, VMware Tanzu.

OCP Administration: Cluster Upgrades (Connected & Disconnected), oc-mirror, Image Mirroring, RBAC, Pod Autoscaling, Cluster Health Validation

Security & Compliance: Compliance Operator, CIS Benchmarks, DISA STIG, Cluster Hardening, Vulnerability Remediation, SSL/CA Certificate Management

Backup & DR: OADP, ETCD Backup & Restoration Automation, Disaster Recovery Scripting

Monitoring & Logging: Grafana, Prometheus, Alertmanager, ELK Stack.

Automation & CI/CD: Ansible, Bash, YAML.

OS & Patch Management: RHEL, Ubuntu, Red Hat Satellite, Capsule Server, Errata Tracking

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Prodevans Technologies Pvt. Ltd. — Bengaluru & Mumbai

OpenShift Container Platform (OCP) Administrator L2 Feb 2026 – Present

- Took handover of a production OCP 4.20.18 cluster running OpenShift Virtualization with 67 VMs, business-critical application, validated cluster architecture and functionality prior to accepting ownership.
- Brought the cluster to production-ready standard by deploying the Compliance Operator against CIS benchmarks, establishing continuous compliance scanning, reporting, and remediation.
- Designed and implemented cluster-wide monitoring and alerting for proactive detection of infrastructure and application issues.
- Deployed OADP to enable automated backup and restore for cluster workloads, strengthening disaster-recovery readiness.
- Engineered a Bash-based ETCD backup and restoration automation solution that dynamically elects the healthiest recovery host and executes full cluster restoration, significantly cutting manual DR effort and downtime risk.
- Ran a comparative CIS vs. DISA STIG compliance assessment using the Compliance Operator and executed cluster-wide hardening based on findings.

Technical Consultant (Promoted from Intern Technical Consultant) Aug 2025 – Jan 2026

- Bank of Baroda Client (L1.2 Technical Support): Built Grafana dashboards monitoring Tanzu, Kafka, Jenkins, Oracle DB, MongoDB, Redis, ELK, and Tomcat, deployed microservices via Jenkins CI/CD to VMware Tanzu, performed L2 troubleshooting, Oracle Exporter/Prometheus integration, and SSL/CA certificate renewals.
- MCX Client (Linux System Administrator): Managed 800+ RHEL servers, led CIS hardening and patch management, automated administration with Ansible, operated Red Hat Satellite/Capsule for disconnected patching and errata tracking.
- Vodafone Client (OpenShift Administrator): Executed OCP platform upgrades in a disconnected environment via oc-mirror, built YAML image-mirroring configs, monitored post-upgrade cluster stability.

CERTIFICATIONS

- RHCSA — Red Hat Certified System Administrator
- Red Hat OpenShift Administration
- GitLab Solutions Architect Core

EDUCATION

Bachelor of Computer Applications July 2022 - June 2025— CGPA: 8.7
